## SPATIAL DATA

## Administrative and Settlement Division

Data of administrative and settlement units is derived from the Land Cadastre. Attribute data is derived from the official **Estonian Administrative and Settlement Classification** (EHAK) maintained by the **Statistics Estonia** . A regular snapshop is taken on January 1 each year, but intermediary snapshots are taken when the changes in the Cadastre are significant.

#### Schematic maps of county and municipality borders for public use:

- Municipalities and counties with name and EHAK classification (PNG)
   (► 116.2 KB, 6.11.2020)
- Municipalities borders (PNG) ( 58.9 KB, 5.11.2020 )
- <u>Counties borders (PNG)</u> ( 42.2 KB, 5.11.2020 )

The data is available at three levels: counties, municipalities and settlements. The data includes attributes as described below.

Data properties		
Format	Esri SHP, MapInfo (TAB), AutoCAD (DXF), MicroStation (DGN)	
Data structure	vector areas	
Scale	1:10 000	
Update frequency	Downloadable files are updated monthly (at the beginning of the month)	
Licence	The use of administrative and settlement units data is not restricted, but the reference to the data source (i.e. Estonian Land Board) and validity date must be made!  For example: "Administrative and settlement units, Estonian Land Board 01.04.2020"
